UNIVERSAL MEDICAL EVALUATION/PROGRESS REPORT

****THIS EVALUATION MUST BE COMPLETED IN FULL OR IT WILL BE RETURNED****

ANY MEDICAL CHARGES INCURRED ARE THE RESPONSIBILITY OF THE PATIENT

PLEASE INDICATE REASON FOR THE EVALUATION

Complete Sections A, B, D & E if you are selecting one of the four reasons below. See front and back of form.

- ☐ Applying for a Vermont License/Permit
- ☐ School Bus Endorsement (Type II)
- ☐ Department Request
- ☐ New/Update Medical Condition

Complete ALL Sections if requesting a DISABLED PLACARD OR PLATES. See front and back of form.

- ☐ Disabled Parking Placard (must be accompanied by a Disabled Parking Placard Application ~ TA-VD-120)
- ☐ Disabled Parking Plate (must be accompanied by a Registration, Tax and Title Application ~ TA-VD-119)

A NOTE TO PARKING PLACARD APPLICANTS: THE INFORMATION IN THIS MEDICAL MAY BE CONSIDERED IN DETERMINING YOUR LICENSE STATUS

SECTION A - TO BE COMPLETED BY APPLICANT

PATIENT'S NAME:	
PATIENT'S MAILING ADDRESS:	Street / Road / Box Number
	City / State / Zip Code
Physical Address – If Different From Mailing Address	

GENDER: ☐ MALE ☐ FEMALE — CHECK-MARK THE APPROPRIATE BOX IF THE ABOVE IS A CHANGE TO YOUR: ☐ MAILING ADDRESS ☐ PHYSICAL ADDRESS

DATE OF BIRTH	SOCIAL SECURITY NUMBER	VT DRIVER LICENSE/ID NUMBER (If Applicable)

IF THIS IS A NAME CHANGE, LIST FORMER NAME:

I CERTIFY THAT THE INFORMATION CONTAINED ABOVE IS TRUE, COMPLETE AND CORRECT TO THE BEST OF MY KNOWLEDGE. STATEMENTS AND WARRANTS HEREIN ARE CERTIFIED UNDER PENALTY OF 23 VSA §202 & §203.

➢ APPLICANT'S SIGNATURE:

SECTIONS B, C, D & E – TO BE COMPLETED BY MEDICAL EXAMINER

SECTION B

1. Patient has been under my care for _____ years.
2. Check-mark any/all of the following conditions that apply:

❑ SEIZURES	❑ CANCER	❑ SPINAL INJURY	❑ HYPERTENSION
❑ DIABETES	❑ COPD	❑ ARTHRITIS/DEGENERATIVE JOINT DISEASE	

❑ **AMPUTATION:**
ARM: ❑ Left ❑ Right
LEG: ❑ Left ❑ Right
Describe cause and extent (example: at elbow, below knee) of amputation:

❑ **PERMANENT DISABILITY/ CONDITION:**
Specify:

❑ **PSYCHIATRIC DISORDER:**
Specify:

3. Blood pressure reading is required for **all school bus driver medicals**. For other licensed drivers, only indicate if a medical condition exists. **Systolic:** _____ **Diastolic:** _____

DEPARTMENT USE ONLY SECTION			MEDICAL DATE:
RATER #:	TRANSACTION TYPE:	TYPE:	/

Liability Release and Emergency Medical Treatment Agreement

MEDICAL RELEASE ON BEHALF OF MINOR AND HOLD HARMLESS AGREEMENT

My son/daughter _____ has my permission to attend
print full name

Gym Night at Campbell Community Center
Event Place

on Friday, February 26 from 7:45pm to 9:45pm
Date Times

Pursuant to the peovisions of Section 25.8 of the California Civil Code, I hereby authorize Chinese Church in Christ to procure medical or hospital care for my child in the event of injury or illness. I understand and agree that I am financially responsible for any care so procured.

I UNDERSTAND AND DO HEREBY AGREE TO ASSUME ALL OF THE RISKS AND OTHER RELATED RISKS WHICH MAY BE ENCOUNTERED BY MY SON/DAUGHTER PARTICIPATING IN THE ABOVE ACTIVITY.

I agree that I hereby hold harmless and waive any and all claims against Chinese Church in Christ, its staff, and leaders for any accident, bodily or personal injury, damage to or loss or theft of any property, illness, or death of any person, including without limitation demands, liabilities, damages, judgments, losses, costs, expenses and/or penalties, including attorneys' and consultants' fee and disbursements, which arise out of joining **The Leadership Training Summit** sponsored by Chinese Church in Christ.

I further state **that I HAVE CAREFULLY READ THE FORGOING RELEASE AND KNOW THE CONTENTS THEREOF AND IS SIGNING THIS RELEASE AS AN ACT OF MY OWN FREE WILL.** This is a legally binding agreement which I have read and understand.

D c full form medical. D n full form. D.n.s full form in medical uses. D.n.s fluid full form in medical in hindi. D n b full form in medical. What does a n d stand for medical. Di list full form in medical.

Intravenous fluids RL is for Ringer’s lactate; NS stands for normal saline; DNS stands for dextrose normal saline; Iso-G and Iso-M both stand for isolyte-G and isolyte-M, respectively. Abbreviations. What does NS mean in DNS? ‘nameserver’ is what the abbreviation NS stands for, and the nameserver record reveals which DNS server is the most trusted for a certain domain (i.e. which server contains the actual DNS records). In its most basic form, NS records provide the Internet with instructions on how to locate a domain’s IP address. What is a NSNs record? Name server is what NS stands for, and this record reveals which DNS server is the most trusted for that particular domain (which server contains the actual DNS records). What are DNS records and how do they work? They have the appearance of a website’s URL, but rather than going to the website itself, they link to the authoritative nameservers for the domain name.The majority of your DNS records, with a few notable exceptions such NS and glue records, are stored on the authoritative nameservers.When you purchase a domain name, the domain registrar will often set it up with certain default NS records that they will handle. You might be interested: How To Make Medical Oxygen?How many NS records should I have in DNS? In most cases, you will have a minimum of two NS records. They have the appearance of a website’s URL, but rather than going to the website itself, they link to the authoritative nameservers for the domain name. The majority of your DNS records, with a few notable exceptions such NS and glue records, are stored on the authoritative nameservers. What is difference NS and DNS? NS is short for ″Normal Saline.″ (The concentration of sodium chloride in normal saline solution is 0.9%), which is the same as the blood’s isotonicity. Dextrose Normal Saline is abbreviated as DNS. (The concentration of dextrose in this solution can be anywhere between 5% and 10%, and the sodium chloride content is 0.9%). Why is a patient given a DNS? After sustaining an accident or trauma of any kind, the patient is protected against dehydration and an electrolyte imbalance by Dns Solution. It is provided in the form of an injection by a medical professional or a nurse and should not be given by the patient themselves. Be sure to pay close attention to the directions given to you by your medical professional. When is a patient given a DNS? In order to supply your body with more water and carbohydrates, Dns Infusion is administered to it (calories from sugar). When a patient is unable to consume enough liquids on their own or when more fluids are required after surgery or trauma, this treatment option is utilized. alternatively, pulmonary edema (when fluids build up in the lungs). What is the use of NS in medical? The term ″normal saline″ refers to salt in its ionic form. This medication is effective against some strains of germs. Normal saline is the solution that is used to flush out an intravenous (IV) catheter after you have had an IV infusion. This helps to prevent blockages and eliminates any medication that may have been left behind in the catheter region. What is DNS full form? The Domain Name System, often known as DNS, is responsible for translating domain names that are readable by humans (such as www.amazon.com) into IP addresses that are readable by machines (such as 192.0. What is DNS saline full form? Dextrose Normal Saline (DNS), Packaging Size: 500 And 1000 ml. Can DNS be used in fever? AXA PARENTERALS is the company that makes the infusion known as D.N.S. Infusion. It is frequently utilized for the diagnosis or treatment of blood and fluid loss, dehydration, and carbohydrate depletion. In addition, it may be employed as a diagnostic tool. It can cause allergic responses, abnormally low phosphate levels, diabetes mellitus, and fever, among other potential adverse effects. What is DNS function? In order for the initial client to be able to load the requested Internet resources, it is the responsibility of the domain name system, often known as ″DNS,″ to translate domain names into particular IP addresses. The domain name system operates similarly to a phone book, allowing users to look up a specific individual and receive that person’s contact information by searching for them. What is a DNS and how does it work? The Domain Name System (DNS) is responsible for translating domain names into the IP addresses that web browsers require in order to load web sites. Every piece of hardware that is connected to the internet has its own unique Internet Protocol (IP) address. This address may be used by other devices on the internet to locate the hardware in question. You might be interested: What Is Pmc In Medical Terms?What is DNS injection? Dextrose and Sodium Chloride are the two medications that are combined to create the Dns Infusion. They accomplish this by replacing the plasma in the blood that has been lost as a result of acute bleeding. Plasma is essential for the circulation of red blood cells, which are responsible for transporting oxygen throughout the body. What is DNS in pharmacy? If you have a prescription, ″DNS″ stands for ″Do Not Substitute.″ When is normal saline given? The management and treatment of dehydration (such as hypovolemia, shock), metabolic alkalosis in the context of fluid loss, and moderate sodium depletion can all benefit from the use of normal saline, which is the crystalloid that is used the most frequently across the world. What is normal saline side effects? Fever and headaches are two common adverse reactions to normal saline. Inflammation at the injection site, A reddish hue, or Infection Why saline is given? IV saline is used to replace fluids that have been lost, flush wounds, give medications, and support patients who are undergoing medical procedures such as surgery, dialysis, or chemotherapy.Even in settings other than hospitals, saline IVs are becoming increasingly used as a hangover treatment.It has high concentrations of salt and chloride, concentrations that are greater than those seen in blood. Everyone born in the United States receives a unique, nine-digit Social Security number at birth. Without this identifier, you can’t enjoy many of the perks that American citizens and legal residents take for granted, including retired and disabled worker benefits. Of course, you also need a Social Security number to file your taxes. Business entities don’t get – or need – Social Security numbers. However, they can obtain a unique, nine-digit identifying number through a system that’s nearly as ubiquitous as Social Security: the Data Universal Numbering System, or D-U-N-S. If you own your own business or are thinking about starting one, you should know more about the uses, benefits, and drawbacks of having a D-U-N-S number. What Is D-U-N-S? Origins and Eligibility The Data Universal Numbering System is a business identification database established in 1963 by Dun & Bradstreet, a private company. According to Dun & Bradstreet, virtually any distinct business entity – nonprofits, sole proprietorships, LLCs, partnerships, corporations, and even government agencies – can apply for and receive a unique, nine-digit D-U-N-S number. There are currently 225 million of them. D-U-N-S numbers may be issued with or without dashes for readability: XX-XXX-XXXX or XXXXXXXXX. Unique numbers may also be assigned to subsidiaries and branches of larger firms. For instance, if Acme Widget Company wholly owns Acme Distribution Company, the two firms could have distinct D-U-N-S numbers. And, technically, any separate business location – the two Chipotle restaurants on opposite sides of town, for instance, or even two separate corporate divisions that occupy different suites in the same building – can apply for a unique number.Motley Fool Stock Advisor recommendations have an average return of 372%. For $79 (or just $1.52 per week), join more than 1 million members and don't miss their upcoming stock picks. 30 day money-back guarantee. Sign Up Now D-U-N-S + 4 However, at this level of organization, a company may prefer to use a D-U-N-S + 4 number. This is a parent- or subsidiary-level D-U-N-S number with a four-digit suffix that helps vendors, customers, and government agencies identify smaller units for accounting purposes. Unlike the main D-U-N-S database, Dun & Bradstreet doesn’t endorse or maintain these four-digit suffixes – companies create and manage them internally. If you own a small business, you probably won’t need to worry about D-U-N-S + 4 right away. Why Do You Need a D-U-N-S Number? Each D-U-N-S number conveys certain information about the business it represents: Verification of Existence and Operation. For your suppliers, customers, contractors, and anyone else who might do business with you, your D-U-N-S number signifies that your company or organization exists and is operational. When a business ceases to operate, its entry is closed to reflect that.Demographic Information. Your D-U-N-S entry is an official, highly detailed directory listing that lets others find and learn about your company. It includes your company’s physical location, contact information, ownership, business structure, industry, employee count, aliases (“doing business as” designations), and historical financial data.Corporate Relationships. D-U-N-S numbers are assigned randomly, so their digits don’t carry any special meaning. However, they do reveal connections between related companies. If your company is part of a larger corporate hierarchy, your D-U-N-S entry reflects this by linking to the entries of your subsidiaries, branches, and corporate parent. Your D-U-N-S number also confers many privileges. You need one to apply for a government contract and, in some places, to do business in a foreign country. It also allows your lenders and suppliers to obtain information about your business, boosting your credibility and possibly making it easier for you to get a favorable loan or credit line. You can also glean information about other companies by using their D-U-N-S numbers. This can help you find potential clients or partners – and make educated decisions about whether and how to do business with them. Key Characteristics of a D-U-N-S Number Each D-U-N-S number has several important characteristics: Permanence. Once issued, a D-U-N-S number is permanent – regardless of changes in ownership or domicile, or financial events like Chapter 11 bankruptcy. If an entity liquidates its assets and ceases to operate, its D-U-N-S number is never reissued.Global Use. D-U-N-S is pervasive and global. As of August 2013, there were about 225 million unique D-U-N-S entries from businesses in about 190 countries. No other business registry, even at the international level, has as many entries.Compatibility With National Business Registries. Many governments use D-U-N-S as a de facto business registry for companies they work with. For instance, the United States’ Central Contractor Registration system uses D-U-N-S as its primary method of business identification: To apply for a government contract, you need a D-U-N-S number first. In many countries, D-U-N-S is the only accepted means of identifying businesses headquartered in other countries, even if they don’t do business with the local government. In Germany, a national business registry called Unique Partner Identification Key (UPIK) uses D-U-N-S numbers to sort businesses. How to Apply for a D-U-N-S Number You can apply for a D-U-N-S number through Dun & Bradstreet. It’s free to do so, though D-U-N-S registration is included in certain Dun & Bradstreet paid credit monitoring and business intelligence packages, such as the Small Business Starter. Before applying, check to see if your company already has a D-U-N-S number – this may be the case if you purchased the business from a previous owner. You can search for your company, by name, through D&B’s online D-U-N-S database or call (866) 705-5711 to ask a representative. If you don’t have a D-U-N-S number, you can request one by phone at the above number, which is staffed between 8am and 6pm, seven days per week, in all U.S. time zones. You can also apply online through Dun & Bradstreet’s website or the Federal Government’s Central Contractor Registration (CCR) system, the portal for all U.S. government contractors. From the time you submit your application, it can take up to 30 days to receive your number. Paid D&B plans, such as the Small Business Starter, can speed the process to two business days. To apply for a D-U-N-S number, you need to provide the following: The name, address, and founding year of your company The name of its owner Its legal structure (partnership, LLC, sole proprietorship, and so on) A basic description of its business activity Total employee count (full- and part-time) What Can You Do With One? The information contained in your D-U-N-S entry creates opportunities for your business, as well as other entities that wish to do business with you: Keep Accurate Business Data. Dun & Bradstreet claims to spend more than $1 million per day to maintain the D-U-N-S database, verifying and updating each entry’s data. Accordingly, you can trust your D-U-N-S entry, and those of the companies you do business with, to be accurate and up-to-date. Many electronic business directories, such as Manta, offer no such guarantee.Work With Government Entities. If you don’t have a D-U-N-S number, you can’t apply for a contract with any government agency or secure a Small Business Administration loan. You also can’t get work with the United Nations and many foreign governments, though you should check with the appropriate sources if you want to do business with an overseas entity.Do Business With Foreign Companies. Even if you don’t need to work with a U.S. or foreign government agency, you may still want to do business with foreign private companies. Since D-U-N-S is the de facto business registry in many countries, having a D-U-N-S number is the easiest way to establish your legitimacy for potential clients overseas. Also, depending on the local government’s policy, your company may need to obtain a D-U-N-S number before setting up a branch or subsidiary in another country.Establish Credibility With Lenders. As part of their due diligence, lenders may refer to your D-U-N-S entry for basic financial and demographic information about your business. They may also purchase credit reports and business intelligence on your company from Dun & Bradstreet. This information is proprietary to Dun & Bradstreet, so if you don’t have a D-U-N-S number, prospective lenders may have an incomplete picture of your company’s finances and operations, potentially making them less likely to give you a loan.Maintain Better Risk Management With Clients. If your company extends lines of credit to its customers, you can use their D-U-N-S numbers to better understand their overall health. For instance, even if one of your client companies appears financially sound, its parent company may be in trouble. By revealing the link between the two, D-U-N-S can help you spot a potential problem before the company goes out of business or cancels the contract.Maintain Better Purchasing Power With Suppliers. Your company may do business with multiple suppliers that operate under the same corporate umbrella, but the relationship may not always be apparent. By analyzing each supplier’s D-U-N-S entry, you can tease out hidden corporate relationships and use them to your advantage during supply contract negotiations. For instance, instead of buying from four different suppliers owned by the same parent company, you may be able to buy four times as much from a single supplier – and secure a bulk discount in reward.Receive Better Information About Prospects. If you run a B2B company, your success depends on your ability to identify the most promising prospects and turn them into paying customers. With demographic, financial, and contact information for millions of companies, the D-U-N-S database allows you to find and reach out to the firms most likely to require your products and services.Expedite Your Application for an SSL Certificate. If your company wants to set up an e-commerce portal, it needs to apply for an SSL certificate, an essential security feature for online transactions. Organizations that issue these certificates typically require thorough contact, ownership, and demographic information about each applicant. Your D-U-N-S entry contains all of that information, allowing the SSL issuer to quickly verify your company’s identity and activate your certificate. Without a D-U-N-S number, your SSL issuer may request a bevy of faxed or emailed documents, substantially increasing the length and complexity of the application process. Potential Disadvantages Having a D-U-N-S number confers a lot of benefits, but it’s also important to understand the system’s limitations and potential drawbacks. Dun & Bradstreet Profits From D-U-N-S. Though D-U-N-S is the business registry of choice across much of the world, Dun & Bradstreet doesn’t maintain it out of the goodness of its heart. Once you’re in the database, D&B (and Dun & Bradstreet Credibility Corp, a former subsidiary that offers similar services) regularly pushes you to sign up for services such as credit monitoring and business intelligence, which could become annoying.Virtual Monopoly on Business Identification. In the U.S., European Union, Australia, and elsewhere, D-U-N-S is by far the most popular and comprehensive business identification database – to the point where it has no real competition. This situation may be increasing the system’s overall cost to the governments and companies that use it. For instance, according to the Government Accountability Office, the Federal Government’s contract with D&B is worth more than $150 million as of 2010. To see if another system would be feasible (and cheaper), or perhaps just to pressure D&B in future contract negotiations, the government is looking at alternative business identification frameworks. However, it’s not clear how much, if anything, the switch to another system would save.Not Completely Transparent. The information contained in D-U-N-S is proprietary to Dun & Bradstreet. For starters, this means that D&B isn’t obligated to say how it’s sourced. It also isn’t obligated to sell or transfer any D-U-N-S information, which could hamper a future switch to another business identification system. And, despite its status as the Federal Government’s de facto business registry, D&B isn’t obligated to comply with Freedom of Information Act (FOIA) requests from members of the press or public, making it difficult to independently verify the information in its database. Final Word Dun & Bradstreet calls D-U-N-S “Social Security numbers for businesses.” In reality, it’s even more pervasive than Social Security. The system is used in dozens of countries around the world, including the U.S., Australia, and the European Union, and confers numerous benefits on businesses that participate. Though you don’t need a D-U-N-S number to operate, having one can open doors that would otherwise remain shut. At the same time, you should be aware of potential issues surrounding this system, including questions about privacy. As with any database, participating in D-U-N-S creates a public footprint that lets others – good and bad – find your company. For all the system’s perks, your decision to get a D-U-N-S number must be a personal one. Does your business have a D-U-N-S number?
